

29/11/17

## Welcome to the course **Wood as an engineering materials 1TS018!**

You have applied and been accepted to the course **Wood as an engineering materials 1TS018** at the Department of Forestry and Wood Technology, Faculty of Technology. You are welcome to the course.

### **Introduction**

We will start with a brief course introduction on **15 January 2018 (13:00-14:00)**. The whole course consists of several lectures. This course deals with some physical and mechanical properties of wood. Realization the relationship between the wood structure and behaviour of wood in use is the main objective of this course. Laboratory work and report writing will help to deepen your knowledge about the physical and mechanical properties of wood. **On 28 February 2018 (8:00-18:00)**, you will perform laboratory work at Linnaeus University.

In study guide, details about the course schedule, quiz, examination, grading criteria etc. are described which is available in [MyMoodle](#) page. This course will be taught in English. However, you can choose either English or Swedish in your final written exam.

For distance students, a computer with internet access is necessary. A headset with microphone is also required in order to connect the classroom via Adobe Connect. However, you need to be physically present in the campus for laboratory work.
