# Advice from previous students

---

- Don't overuse late-submission extensions
- Explore and play! DH is a big world, and depending on your background you need to explore and find the niche that works for you
- T-shaped scholarship: Broad coverage with narrow specialization
- Failing forward
- Be social! Don't let distance learning be an isolating experience.

# Remember to register for courses in Ladok

---

## 4. Register

To keep your study place, you must register by the start of the semester or course. The registration period opens one week before the start of each course and remains open for two weeks. If you are studying on a programme, you must register at the start of each course to continue to be considered an active student on the programme. If you are studying courses that run over several semesters, you must register at the start of each semester to continue to be considered active on the course.

You register in [Ladok for students](#). The registration period opens one week before the start of the course. When registering, you show that you are an active student at Linnaeus University.

# Methods for Digital Humanities (Baladria Summer School in Digital Humanities)

5 credits

The aim of this course is to learn about digital research methods to address research questions from the humanities. The course gives an overview of the impact of digitisation on the way research is conducted, an insight into a range of the different digital methods, as well as an awareness of difficulties related to the methods/tools. The course will cover several methods/tools, with students engaging in hands-on activities and sharing their findings throughout the course. In the final project of the course, the student has the option to focus on specific digital methods and tools.

After completing the course the student should be able to:
