

## **Högskolecentrum - a abstinent zone**

Högskolecentrum is a unique environment for training in close collaboration with industry. Abuse involves great personal problems for the student. It means difficulty managing studies and privacy around their studies. It also makes it difficult to cope with periods of practice on business and may ultimately lead to difficulties in finding work. Therefore, prevention of abuse is needed as quickly as possible. Drug Policy in Högskolecentrum aims to counteract the occurrence of abuse and as quickly as possible put into personalized action to prevent a continuation.

### **Policy Program**

#### **Tobacco**

Smoking is prohibited in Högskolecentrum premises. Smoking in designated areas outdoors is permitted. Smoking Cessation Program is offered through the Student Health.

#### **Alcohol**

Students must not drink alcohol or appear intoxicated in the Högskolecentrum premises or in connection with the activities organized by or in conjunction with the school unless specifically waived. If this happens informed educational leadership are responsible for disposing of the alcohol and dismiss the student from the premises.

#### **Other drugs**

We want to prevent all use of drugs and drug distribution. The same applies to doping and other preparations referred to in Law (1999: 42) "Prohibition of hazardous goods" as well as drugs used otherwise than as prescribed by the doctor. Whoever discovers that someone holds, stores, sells, conveys or is influenced by any of the above mentioned preparations announces education management. Information may be submitted anonymously. Drugs of this type are collected and submitted to the police for further investigation.

#### **Action plan / action**

Students who appear drunk or drugged expelled from Högskolecentrum of education management. Denies the student that he/she is under the influence offered appropriate sampling, primarily Health Centre. If sampling is not accepted by the student, without verifiable medical or religious grounds, it is regarded as an admission of intoxication/impact. On suspicion of drug use as above commence an investigation. Education Leaders ensures that the student next day arises for calls. All offenses and incidents linked to intoxication/abuse shall be documented by the program management and presented to the student to raise the awareness problem. Confirmed, or confirmed the fears, an action plan in collaboration with specialists in drug abuse (Navet or Health care). Although social services and police can if necessary be contacted to participate in the action plan. If the student refuses to participate in the drafting of action plan, do not follow the established plan or continue violating drug policy, the student may be separated from education.
